

S3 Fig. Semipreparative fractionation chromatograms of eight *Burkholderia* isolates. Fractions subsequently analyzed via LC-HRMS are indicated with 'f' and a number, corresponding to the fractions listed in Table 4.

***B. gladioli* R-20794**

Due to similarity of the profile with strain R-16098, none of the fractions were analyzed via HR-LCMS,

***B. glumae* R-1678**

***B. cepacia* R-24575**

Other Bcc I R-12632

Other Bcc I R-14280

B. singularis LMG 28155

Because none of the fractions showed >40% growth inhibition of at least one of the two pathogens tested, none of the fractions were analyzed through HR-LCMS,
