

**Table S1.** Results of linearity of the GC–MS assay for 1,8-cineole, terpinen-4-ol, and (-)- $\alpha$ -bisabolol.

Content from standardized value, %	Concentration of the standard solution of 1,8-cineole, weight %	Concentration of the standard solution of terpinen-4-ol, weight %	Concentration of the standard solution of (-)- $\alpha$ -bisabolol, weight %	Analytical response for each component (peak area)
0 (Blank)	0	0	0	0 0 0
0.01	0.0005	0.00015	0.0005	76950 38594 56910

**Table S2.** The linear functions for 1,8-cineole, terpinen-4-ol, and (-)- $\alpha$ -bisabolol standard solutions.

Compound	R <sup>2</sup>	Linear function
1,8-cineole	0.999	Y = 1.367265×10 <sup>8</sup> ×X
Terpinen-4-ol	0.999	Y = 2.452336×10 <sup>8</sup> ×X
(-)- $\alpha$ -bisabolol	0.999	Y = 9.391526×10 <sup>7</sup> ×X
