

**Table S2 Patients infected with carbapenem-resistant *Klebsiella pneumoniae* during the COVID-19 pandemic**

	All patients / COVID-19 positive		
	Males (n)	Females (n)	Total (n)
<b>All CRKP-positive patients (2020-2022)</b>	48 / 28	47 / 17	95 / 45
<b>Patients in intensive care</b>	34 / 22	24 / 16	58 / 38
<b>Patients on APV</b>	30 / 19	18 / 15	48 / 34
<b>Patients with CRKP-caused VAP</b>	30 / 19	18 / 15	48 / 34
<b>CRKP bloodstream invasion in patients with pneumonia</b>	3 / 3	3 / 3	6 / 6
<b>In-hospital mortality – all patients in intensive care</b>	29 / 19	18 / 14	47 / 33
<b>In-hospital mortality - patients with CRKP-caused VAP</b>	18 / 12	13 / 12	31 / 24

*CRKP – carbapenem-resistant Klebsiella pneumoniae, APV - artificial pulmonary ventilation; VAP – ventilator-associated pneumonia*
