Oxyresveratrol characterization

Oxyresveratrol (**Figure S4**), yellow solid; R_f 0.38 (n-hexane:EtOAc, 3:7); Purity $99.16 \pm 0.07\%$ (HPLC) (**Figure S5**); $^1\text{H-NMR}$ (Acetone-d₆, 400 MHz) δ ppm : 7.42 (1H, d, $J = 8.4$ Hz, H-6), 7.35 (1H, d, $J = 16.4$ Hz, H- β), 6.91 (1H, d, $J = 16.4$ Hz, H- α), 6.52 (1H, d, $J = 2.0$ Hz, H-2' and H-6'), 6.44 (1H, d, $J = 2.4$ Hz, H-3), 6.39 (1H, dd, $J = 8.4, 2.4$ Hz, H-5), 6.24 (1H, t, $J = 2.0$ Hz, H-4') (**Figure S6a, S6b**); IR (ATR) ν max cm⁻¹: 3209 (OH), 2921 (sp³ CH), 1589 (C=C aromatic) (**Figure S7**); -ESI-MS m/z (% rel. int.): 243.0654 [M]-, C₁₄H₁₂O₄ (**Figure S8**). The characterization information of the isolated compound was confirmed by all spectra as oxyresveratrol, which was consistent with previous report by Arriffin, N. et al (2017). (Arriffin, N.; Jamil, Sh.; Basar, N.; Khamis, S.; Abdullah, A. S.; Lathiff S. M. Phytochemical Studies and Antioxidant Activities of *Artocarpus scorchedinii* King. Records of Natural Products 2017, 10, 299-303.)
