### **Contents**

Supplementary S1: Search strategy .....	3
Supplementary S2: Excluded studies .....	7
Supplementary S3: Study characteristics .....	18
Supplementary S4: Risk of bias assessment .....	39
Supplementary S5: Forest plots .....	45
5.1. Arteriovenous fistula/graft vs. Central venous catheter .....	45
5.2. Arteriovenous fistula vs. Arteriovenous graft .....	47
5.3. Successful arteriovenous fistula use .....	49
5.4. Primary arteriovenous fistula patency .....	50
5.5. Transition from central venous catheter to arteriovenous fistula/graft .....	51
5.6. Home dialysis .....	53
5.7. Peritoneal dialysis .....	54
5.8. Dialysis survival .....	56
5.9. Waitlisting .....	61
5.10. Kidney transplantation .....	65
5.11. Living-donor transplantation .....	70
5.12. Deceased-donor transplantation .....	73
5.13. Preemptive transplantation .....	76
5.14. Graft survival .....	77
5.15. Kidney transplantation survival .....	80
Supplementary S6: Funnel plots .....	82
6.1. Arteriovenous fistula/graft vs. Central venous catheter .....	82
6.2. Arteriovenous fistula vs. Arteriovenous graft .....	84
6.3. Successful arteriovenous fistula use .....	86
6.4. Primary arteriovenous fistula patency .....	87
6.5. Transition from central venous catheter to arteriovenous fistula/graft .....	88
6.6. Home dialysis .....	90
6.7. Peritoneal dialysis .....	91
6.8. Dialysis survival .....	94
6.9. Waitlisting .....	98

6.10. Kidney transplantation.....	101
6.11. Living-donor transplantation .....	104
6.12. Deceased-donor transplantation .....	107
6.13. Preemptive transplantation.....	110
6.14. Graft survival.....	112
6.15. Kidney transplantation survival .....	115
Supplementary S7: Subgroup analyses.....	117
Supplementary S8: Sensitivity analysis.....	130
Supplementary S9: Summary of findings.....	131
Supplementary S10: PRISMA checklist .....	135

## Supplementary S3: Study characteristics

**Suppl. Table S2.** Methodological characteristics of the included studies

Study	Country	Design	Data source	Sample size	Time period	Population	Male sex (%)	Peritoneal dialysis (%)	Diabetes mellitus (%)
<b>2021; Qian</b>	USA	Retrospective cohort	USRDS	14,077	2010-2012	Hemodialysis, start with CVC, age $\geq 67$ years	53	0	65
<b>2021; MacRae</b>	Canada	Prospective cohort	5 Canadian dialysis programs	2,375	2004-2012	Hemodialysis	60.9	0	56.1
<b>2021; Pisoni</b>	International	Prospective cohort	DOPPS study	2,040	2009-2015	Hemodialysis	60.8	0	60
<b>2021; Schellartz</b>	Germany	Retrospective cohort	Health insurance data	4,727	2012-2016	Hemodialysis/ Peritoneal dialysis	58	3.7	N/A
<b>2021; Barth</b>	Hungary	Retrospective cohort	Study data	254	2020	ESKD, age $\leq 75$ years	65	11	20
<b>2021; Wesselman</b>	USA	Prospective cohort	Study data	1,056	2010-2012	ESKD	62	10	N/A
<b>2021; Cirillo</b>	Italy	Retrospective cohort	Campania province data	11,716	2014-2018	ESKD	61.5	1.4	N/A
<b>2021; Ahearn</b>	USA	Retrospective cohort	USRDS	1,478,037	2005-2017	ESKD	57	N/A	33.4
<b>2021; Rita</b>	Switzerland	Prospective cohort	Swiss Transplant Cohort Study	1,985	2008-2017	Living/deceased-donor transplantation	64	-	N/A
<b>2021; Wiley</b>	USA	Retrospective cohort	Study data	623	2000-2018	Living/deceased-donor transplantation	60	-	33
<b>2021; Belyaev</b>	New Zealand	Retrospective cohort	ANZDATA	837	2008-2018	Living/deceased-donor transplantation	63.3	-	35.2
<b>2021; Park</b>	South Korea	Retrospective cohort	Health insurance data	12,564	2007-2015	ESKD, age $\leq 70$ years	59.1	15.6	33.9
<b>2020; Arya</b>	USA	Retrospective cohort	USRDS	74,194	2010-2013	Hemodialysis, start with CVC, age $\geq 66$ years	53	0	49
<b>2020; Arhuidese</b>	USA	Retrospective cohort	USRDS	359,942	2007-2014	Hemodialysis	57.2	0	54
<b>2020; Copeland</b>	USA	Retrospective cohort	Optum Clinformatics Data Mart	7,584	2012-2016	Hemodialysis, start with CVC	57	0	83
<b>2020; Krishnasamy</b>	Australia	Retrospective cohort	ANZDATA	11,844	2002-2012	Hemodialysis	62.2	0	31.2

<b>2020; Yolgosteren</b>	Turkey	Retrospective cohort	Study data	349	2008	Hemodialysis, start with AVF	57.5	0	34.8
<b>2020; Ku</b>	USA	Prospective cohort	CRIC study	678	2003-2013	Hemodialysis/ Peritoneal dialysis	60.6	13.9	70.4
<b>2020; Hayat</b>	New Zealand	Prospective cohort	New Zealand Peritoneal Dialysis Registry	6,379	1995-2014	Peritoneal dialysis	54.7	100	47.5
<b>2020; Vogel</b>	USA	Retrospective cohort	USRDS	1,324,037	2000-2014	Hemodialysis/ Peritoneal dialysis	56.1	7.7	47.8
<b>2020; Shen</b>	USA	Retrospective cohort	USRDS	523,526	2005-2013	Hemodialysis/ Peritoneal dialysis/ Home dialysis	57.6	8	45.6
<b>2020; Melk</b>	Germany	Retrospective cohort	Health insurance data	8,921	2005-2013	ESKD	55.9	N/A	50.9
<b>2020; Park</b>	South Korea	Retrospective cohort	Health insurance data	12,889	2007-2015	ESKD, age ≤70 years	59.1	10.4	55.9
<b>2020; Pruthi</b>	United Kingdom	Prospective cohort	ATTOM study	2,676	2011-2013	ESKD, age ≤75 years	64	N/A	40
<b>2020; Murphy</b>	USA	Prospective cohort	Scientific Registry of Transplant Recipients	3,013	2009-2018	ESKD	61	11	40

## Supplementary S5: Forest plots

### 5.1. Arteriovenous fistula/graft vs. Central venous catheter

**Suppl. Figure S1.** Forest plot comparing Black and White patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

**Suppl. Figure S2.** Forest plot comparing Asian and White patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

**Suppl. Figure S3.** Forest plot comparing Indigenous and White patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

**Suppl. Figure S4.** Forest plot comparing female and male patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

**Suppl. Figure S5.** Forest plot comparing low and high socioeconomic status patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

## 5.2. Arteriovenous fistula vs. Arteriovenous graft

**Suppl. Figure S6.** Forest plot comparing Black and White patients (reference) regarding dialysis initiation with arteriovenous fistula vs. arteriovenous graft.

**Suppl. Figure S7.** Forest plot comparing Indigenous and White patients (reference) regarding dialysis initiation with arteriovenous fistula vs. arteriovenous graft.

**Suppl. Figure S8.** Forest plot comparing female and male patients (reference) regarding dialysis initiation with arteriovenous fistula vs. arteriovenous graft.

### 5.3. Successful arteriovenous fistula use

**Suppl. Figure S9.** Forest plot comparing Black and White patients (reference) regarding successful arteriovenous fistula use.

**Suppl. Figure S10.** Forest plot comparing female and male patients (reference) regarding successful arteriovenous fistula.

#### 5.4. Primary arteriovenous fistula patency

**Suppl. Figure S11.** Forest plot comparing Black and White patients (reference) regarding primary arteriovenous fistula patency.

**Suppl. Figure S12.** Forest plot comparing female and male patients (reference) regarding primary arteriovenous fistula patency.

**Suppl. Figure S13.** Forest plot comparing low and high socioeconomic status patients (reference) regarding primary arteriovenous fistula patency.

### 5.5. Transition from central venous catheter to arteriovenous fistula/graft

**Suppl. Figure S14.** Forest plot comparing Black and White patients (reference) regarding the transition from central venous catheter to arteriovenous fistula/graft.

**Suppl. Figure S15.** Forest plot comparing female and male patients (reference) regarding the transition from central venous catheter to arteriovenous fistula/graft.

**Suppl. Figure S16.** Forest plot comparing low and high socioeconomic status patients (reference) the transition from central venous catheter to arteriovenous fistula/graft.

## 5.6. Home dialysis

**Suppl. Figure S17.** Forest plot comparing Black and White patients (reference) regarding home dialysis.

**Suppl. Figure S18.** Forest plot comparing Asian and White patients (reference) regarding home dialysis.

## 5.7. Peritoneal dialysis

**Suppl. Figure S19.** Forest plot comparing Black and White patients (reference) regarding peritoneal dialysis use.

**Suppl. Figure S20.** Forest plot comparing Asian and White patients (reference) regarding peritoneal dialysis use.

**Suppl. Figure S21.** Forest plot comparing Indigenous and White patients (reference) regarding peritoneal dialysis use.

**Suppl. Figure S22.** Forest plot comparing female and male patients (reference) regarding peritoneal dialysis use.

**Suppl. Figure S23.** Forest plot comparing low and high socioeconomic status patients (reference) regarding peritoneal dialysis use.

## 5.8. Dialysis survival

**Suppl. Figure S24.** Forest plot comparing Black and White patients (reference) regarding dialysis mortality.

**Suppl. Figure S25.** Forest plot comparing Asian and White patients (reference) regarding dialysis mortality.

**Suppl. Figure S26.** Forest plot comparing Indigenous and White patients (reference) regarding dialysis mortality.

**Suppl. Figure S27.** Forest plot of comparing Hispanic and White patients (reference) regarding dialysis mortality.

**Suppl. Figure S28.** Forest plot comparing female and male patients (reference) regarding dialysis mortality.

**Suppl. Figure S29.** Forest plot comparing low and high socioeconomic status patients (reference) regarding dialysis mortality.

**Suppl. Figure S30.** Forest plot comparing low- and high-income patients (reference) regarding dialysis mortality.

**Suppl. Figure S31.** Forest plot comparing low and high education patients (reference) regarding on dialysis mortality.

**Suppl. Figure S32.** Forest plot comparing unemployed and employed patients (reference) regarding dialysis mortality.

## 5.9. Waitlisting

Suppl.

**Figure S33.** Forest plot comparing Black and White patients (reference) regarding waitlisting.

**Suppl. Figure S34.** Forest plot comparing Asian and White patients (reference) regarding waitlisting.

**Suppl. Figure S35.** Forest plot comparing Indigenous and White patients (reference) regarding waitlisting.

**Suppl. Figure S36.** Forest plot comparing Hispanic and White patients (reference) regarding waitlisting.

**Suppl. Figure S37.** Forest plot comparing female and male patients (reference) regarding waitlisting.

**Suppl. Figure S38.** Forest plot comparing low and high socioeconomic status patients (reference) regarding waitlisting.

**Suppl. Figure S39.** Forest plot comparing low- and high-income patients (reference) regarding waitlisting.

**Suppl. Figure S40.** Forest plot comparing low and high education patients (reference) regarding waitlisting.

**Suppl. Figure S41.** Forest plot comparing unemployed and employed patients (reference) regarding on waitlisting.

## 5.10. Kidney transplantation

**Suppl. Figure S42.** Forest plot comparing Black and White patients (reference) regarding kidney transplantation.

**Suppl. Figure S43.** Forest plot comparing Asian and White patients (reference) regarding kidney transplantation.

**Suppl. Figure S44.** Forest plot comparing Indigenous and White patients (reference) regarding kidney transplantation.

**Suppl. Figure S45.** Forest plot comparing Hispanic and White patients (reference) regarding kidney transplantation.

**Suppl. Figure S46.** Forest plot comparing female and male patients (reference) regarding kidney transplantation.

**Suppl. Figure S47.** Forest plot comparing low and high socioeconomic status patients (reference) regarding kidney transplantation.

**Suppl. Figure S48.** Forest plot comparing low- and high- income patients (reference) regarding kidney transplantation.

**Suppl. Figure S49.** Forest plot comparing low and high education patients (reference) regarding kidney transplantation.

**Suppl. Figure S50.** Forest plot comparing unemployed and employed patients (reference) regarding kidney transplantation.

### 5.11. Living-donor transplantation

**Suppl. Figure S51.** Forest plot comparing Black and White patients (reference) regarding living-donor transplantation.

**Suppl. Figure S52.** Forest plot comparing Asian and White patients (reference) regarding living-donor transplantation.

**Suppl. Figure S53.** Forest plot comparing Indigenous and White patients (reference) regarding living-donor transplantation.

**Suppl. Figure S54.** Forest plot comparing Hispanic and White patients (reference) regarding living-donor transplantation.

**Suppl. Figure S55.** Forest plot comparing female and male patients (reference) regarding living-donor transplantation.

**Suppl. Figure S56.** Forest plot comparing low and high socioeconomic status patients (reference) regarding living-donor transplantation.

## 5.12. Deceased-donor transplantation

**Suppl. Figure S57.** Forest plot comparing Black and White patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S58.** Forest plot comparing Asian and White patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S59.** Forest plot comparing Indigenous and White patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S60.** Forest plot comparing Hispanic and White patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S61.** Forest plot comparing female and male patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S62.** Forest plot comparing low and high socioeconomic status patients (reference) regarding deceased-donor transplantation.

### 5.13. Preemptive transplantation

**Suppl. Figure S63.** Forest plot comparing Black and White patients (reference) regarding preemptive transplantation.

**Suppl. Figure S64.** Forest plot comparing female and male patients (reference) regarding preemptive transplantation.

**Suppl. Figure S65.** Forest plot comparing low and high socioeconomic status patients (reference) regarding preemptive transplantation.

#### 5.14. Graft survival

**Suppl. Figure S66.** Forest plot comparing Black and White patients (reference) regarding graft survival.

**Suppl. Figure S67.** Forest plot comparing Indigenous and White patients (reference) regarding graft survival.

**Suppl. Figure S68.** Forest plot comparing Hispanic and White patients (reference) regarding graft survival.

**Suppl. Figure S69.** Forest plot comparing female and male patients (reference) regarding n graft survival.

**Suppl. Figure S70.** Forest plot comparing low and high socioeconomic status patients (reference) regarding graft survival.

### 5.15. Kidney transplantation survival

**Suppl. Figure S71.** Forest plot comparing Black and White patients (reference) regarding kidney transplantation survival.

**Suppl. Figure S72.** Forest plot comparing Hispanic and White patients (reference) regarding kidney transplantation survival.

**Suppl. Figure S73.** Forest plot comparing female and male patients (reference) regarding kidney transplantation survival.

**Suppl. Figure S74.** Forest plot comparing low and high socioeconomic status patients (reference) regarding kidney transplantation survival.

## Supplementary S6: Funnel plots

### 6.1. Arteriovenous fistula/graft vs. Central venous catheter

**Suppl. Figure S75.** Funnel plot comparing Black and White patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

**Suppl. Figure S76.** Funnel plot comparing Asian and White patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

**Suppl. Figure S77.** Funnel plot comparing Indigenous and White patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

**Suppl. Figure S78.** Funnel plot of female patients (reference) and dialysis initiation with arteriovenous fistula or graft.

**Suppl. Figure S79.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding dialysis initiation with arteriovenous fistula or graft.

## 6.2. Arteriovenous fistula vs. Arteriovenous graft

**Suppl. Figure S80.** Funnel plot comparing Black and White patients (reference) regarding dialysis initiation with arteriovenous fistula vs. arteriovenous graft.

**Suppl. Figure S81.** Funnel plot comparing Indigenous and White patients (reference) regarding dialysis initiation with arteriovenous fistula vs. arteriovenous graft.

**Suppl. Figure S82.** Funnel plot of female patients (reference) and dialysis initiation with arteriovenous fistula vs. arteriovenous graft.

### 6.3. Successful arteriovenous fistula use

**Suppl. Figure S83.** Funnel plot comparing Black and White patients (reference) regarding successful arteriovenous fistula use.

**Suppl. Figure S84.** Funnel plot of female patients (reference) and successful arteriovenous fistula.

**6.4. Primary arteriovenous fistula patency**

**Suppl. Figure S85.** Funnel plot comparing Black and White patients (reference) regarding primary arteriovenous fistula patency.

**Suppl. Figure S86.** Funnel plot of female patients (reference) and primary arteriovenous fistula patency.

**Suppl. Figure S87.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding primary arteriovenous fistula patency.

**6.5. Transition from central venous catheter to arteriovenous fistula/graft**

**Suppl. Figure S88.** Funnel plot comparing Black and White patients (reference) regarding the transition from central venous catheter to arteriovenous fistula/graft.

**Suppl. Figure S89.** Funnel plot of female patients (reference) and the transition from central venous catheter to arteriovenous fistula/graft.

**Suppl. Figure S90.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding the transition from central venous catheter to arteriovenous fistula/graft.

## 6.6. Home dialysis

**Suppl. Figure S91.** Funnel plot comparing Black and White patients (reference) regarding home dialysis.

**Suppl. Figure S92.** Funnel plot comparing Asian and White patients (reference) regarding home dialysis.

### 6.7. Peritoneal dialysis

**Suppl. Figure S93.** Funnel plot comparing Black and White patients (reference) regarding peritoneal dialysis use.

**Suppl. Figure S94.** Funnel plot comparing Asian and White patients (reference) regarding peritoneal dialysis use.

**Suppl. Figure S95.** Funnel plot comparing Indigenous and White patients (reference) regarding peritoneal dialysis use.

**Suppl. Figure S96.** Funnel plot of female patients (reference) and peritoneal dialysis use.

**Suppl. Figure S97.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding peritoneal dialysis use.

## 6.8. Dialysis survival

**Suppl. Figure S98.** Funnel plot comparing Black and White patients (reference) regarding dialysis mortality.

**Suppl. Figure S99.** Funnel plot comparing Asian and White patients (reference) regarding dialysis mortality.

**Suppl. Figure S100.** Funnel plot comparing Indigenous and White patients (reference) regarding dialysis mortality.

**Suppl. Figure S101.** Funnel plot comparing Hispanic and White patients (reference) regarding dialysis mortality.

**Suppl. Figure S102.** Funnel plot of female patients (reference) and dialysis mortality.

**Suppl. Figure S103.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding dialysis mortality.

## 6.9. Waitlisting

**Suppl. Figure S104.** Funnel plot comparing Black and White patients (reference) regarding waitlisting.

**Suppl. Figure S105.** Funnel plot comparing Asian and White patients (reference) regarding waitlisting.

**Suppl. Figure S106.** Funnel plot comparing Indigenous and White patients (reference) regarding waitlisting.

**Suppl. Figure S107.** Funnel plot comparing Hispanic and White patients (reference) regarding waitlisting.

## 6.10. Kidney transplantation

**Suppl. Figure S110.** Funnel plot comparing Black and White patients (reference) regarding kidney transplantation.

**Suppl. Figure S111.** Funnel plot comparing Asian and White patients (reference) regarding kidney transplantation.

**Suppl. Figure S112.** Funnel plot comparing Indigenous and White patients (reference) regarding kidney transplantation.

**Suppl. Figure S113.** Funnel plot comparing Hispanic and White patients (reference) regarding kidney transplantation.

**Suppl. Figure S114.** Funnel plot of female patients (reference) and kidney transplantation.

**Suppl. Figure S115.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding kidney transplantation.

## 6.11. Living-donor transplantation

**Suppl. Figure S116.** Funnel plot comparing Black and White patients (reference) regarding living-donor transplantation.

**Suppl. Figure S117.** Funnel plot comparing Asian and White patients (reference) regarding living-donor transplantation.

**Suppl. Figure S118.** Funnel plot comparing Indigenous and White patients (reference) regarding living-donor transplantation.

**Suppl. Figure S119.** Funnel plot comparing Hispanic and White patients (reference) regarding living-donor transplantation.

**Suppl. Figure S120.** Funnel plot of female patients (reference) and living-donor transplantation.

**Suppl. Figure S121.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding living-donor transplantation.

## 6.12. Deceased-donor transplantation

**Suppl. Figure S122.** Funnel plot comparing Black and White patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S123.** Funnel plot comparing Asian and White patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S124.** Funnel plot comparing Indigenous and White patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S125.** Funnel plot comparing Hispanic and White patients (reference) regarding deceased-donor transplantation.

**Suppl. Figure S126.** Funnel plot of female patients (reference) and deceased-donor transplantation.

**Suppl. Figure S127.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding deceased-donor transplantation.

### 6.13. Preemptive transplantation

**Suppl. Figure S128.** Funnel plot comparing Black and White patients (reference) regarding preemptive transplantation.

**Suppl. Figure S129.** Funnel plot of female patients (reference) and preemptive transplantation.

**Suppl. Figure S130.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding preemptive transplantation.

## 6.14. Graft survival

**Suppl. Figure S131.** Funnel plot comparing Black and White patients (reference) regarding graft survival.

**Suppl. Figure S132.** Funnel plot comparing Indigenous and White patients (reference) regarding graft survival.

**Suppl. Figure S133.** Funnel plot comparing Hispanic and White patients (reference) regarding graft survival.

**Suppl. Figure S134.** Funnel plot of female patients (reference) and graft survival.

**Suppl. Figure S135.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding graft survival.

## 6.15. Kidney transplantation survival

**Suppl. Figure S136.** Funnel plot comparing Black and White patients (reference) regarding kidney transplantation survival.

**Suppl. Figure S137.** Funnel plot comparing Hispanic and White patients (reference) regarding kidney transplantation survival.

**Suppl. Figure S138.** Funnel plot of female patients (reference) and kidney transplantation survival.

**Suppl. Figure S139.** Funnel plot comparing low and high socioeconomic status patients (reference) regarding kidney transplantation survival.

## Supplementary S7: Subgroup analyses

**Suppl. Table S5.** Subgroup analysis of the meta-analysis regarding female patients and dialysis initiation with arteriovenous fistula or graft.

Subgroup	Studies no.	OR (95% CI)	P for subgroup difference
<b>Study location</b>			
<i>North America</i>	2	0.85 (0.84-0.86)	0.611
<i>Oceania</i>	2	0.67 (0.31-1.43)	
<b>Risk of bias</b>			
<i>Low</i>	4	0.78 (0.60-1.02)	0.899
<i>Moderate</i>	1	0.81 (0.72-0.91)	

**Suppl. Table S6.** Subgroup analysis of the meta-analysis regarding low socioeconomic status and dialysis initiation with arteriovenous fistula or graft.

Subgroup	Studies no.	OR (95% CI)	P for subgroup difference
<b>Study location</b>			
<i>North America</i>	4	0.84 (0.69-1.03)	0.216
<i>Oceania</i>	1	0.48 (0.22-1.05)	
<b>Exposure</b>			
<i>Low income</i>	2	0.89 (0.71-1.12)	0.063
<i>Low education</i>	2	0.56 (0.41-0.77)	
<i>Unemployment</i>	1	0.95 (0.84-1.08)	

**Suppl. Table S7.** Subgroup analysis of the meta-analysis regarding female patients and primary arteriovenous fistula patency.

Subgroup	Studies no.	HR (95% CI)	P for subgroup difference
<b>Study location</b>			
<i>North America</i>	2	0.79 (0.72-0.87)	<b>0.025</b>
<i>Europe</i>	1	0.50 (0.34-0.73)	
<i>International</i>	1	1.19 (0.68-2.10)	
<b>Risk of bias</b>			
<i>Low</i>	3	0.80 (0.73-0.88)	<b>0.020</b>
<i>Moderate</i>	1	0.50 (0.34-0.73)	

**Suppl. Table S8.** Subgroup analysis of the meta-analysis regarding low socioeconomic status and primary arteriovenous fistula patency.

<b>Subgroup</b>	<b>Studies no.</b>	<b>OR (95% CI)</b>	<b>P for subgroup difference</b>
<b>Study location</b>			
<i>Oceania</i>	1	0.79 (0.66-0.94)	N/A
<i>Europe</i>	1	0.87 (0.48-1.56)	
<i>Asia</i>	1	0.39 (0.18-0.84)	
<b>Risk of bias</b>			
<i>Low</i>	1	0.79 (0.66-0.94)	0.663
<i>Moderate</i>	2	0.61 (0.28-1.33)	
<b>Exposure</b>			
<i>Low income</i>	2	0.80 (0.67-0.94)	0.076
<i>Low education</i>	1	0.39 (0.18-0.84)	

**Suppl. Table S9.** Subgroup analysis of the meta-analysis regarding Black patients and peritoneal dialysis use.

<b>Subgroup</b>	<b>Studies no.</b>	<b>OR (95% CI)</b>	<b>P for subgroup difference</b>
<b>Study location</b>			
<i>USA</i>	4	0.58 (0.46-0.73)	<b>0.019</b>
<i>Canada</i>	1	1.04 (0.94-1.15)	
<b>Risk of bias</b>			
<i>Low</i>	2	0.87 (0.63-1.22)	<b>0.026</b>
<i>Moderate</i>	2	0.49 (0.40-0.60)	
<i>Serious</i>	1	0.58 (0.42-0.80)	

**Suppl. Table S10.** Subgroup analysis of the meta-analysis regarding female patients and peritoneal dialysis use.

<b>Subgroup</b>	<b>Studies no.</b>	<b>OR (95% CI)</b>	<b>P for subgroup difference</b>
<b>Study location</b>			
<i>North America</i>	4	1.06 (0.97-1.17)	<b>0.002</b>
<i>Europe</i>	1	0.69 (0.50-0.96)	
<i>Asia</i>	1	2.13 (0.77-5.89)	
<i>Oceania</i>	1	1.33 (1.25-1.41)	
<b>Risk of bias</b>			
<i>Low</i>	2	1.04 (0.88-1.23)	0.925
<i>Moderate</i>	4	1.08 (0.76-1.53)	
<i>Serious</i>	1	1.17 (0.90-1.53)	

**Suppl. Table S11.** Subgroup analysis of the meta-analysis regarding low socioeconomic status and peritoneal dialysis use.

Subgroup	Studies no.	OR (95% CI)	P for subgroup difference
Study location			
North America	2	0.47 (0.40-0.55)	<0.001
Europe	1	0.59 (0.45-0.78)	
Asia	1	0.48 (0.14-1.63)	
Oceania	1	0.73 (0.66-0.81)	
Risk of bias			
Moderate	4	0.59 (0.46-0.76)	0.280
Serious	1	0.44 (0.33-0.58)	
Exposure			
Low income	4	0.49 (0.43-0.57)	<0.001
Low education	1	0.73 (0.66-0.81)	

**Suppl. Table S12.** Subgroup analysis of the meta-analysis regarding Black patients and dialysis mortality.

Subgroup	Studies no.	HR (95% CI)	P for subgroup difference
Study location			
North America	11	0.74 (0.69-0.80)	<0.001
South America	1	0.69 (0.50-0.96)	
Europe	6	0.50 (0.44-0.56)	
Population			
Hemodialysis	6	0.72 (0.71-0.73)	0.932
Peritoneal dialysis	1	0.69 (0.50-0.96)	
Mixed	11	0.66 (0.57-0.76)	
Risk of bias			
Low	12	0.68 (0.60-0.77)	0.815
Moderate	6	0.65 (0.56-0.76)	

**Suppl. Table S13.** Subgroup analysis of the meta-analysis regarding Asian patients and dialysis mortality.

Subgroup	Studies no.	HR (95% CI)	P for subgroup difference
Study location			
North America	5	0.68 (0.59-0.79)	0.381
Europe	4	0.68 (0.61-0.76)	
Oceania	3	0.60 (0.49-0.73)	
Asia	1	0.48 (0.25-0.92)	
Population			
Hemodialysis	2	0.62 (0.51-0.77)	0.541
Peritoneal dialysis	4	0.61 (0.45-0.84)	
Mixed	8	0.69 (0.63-0.76)	
Risk of bias

## Supplementary S10: PRISMA checklist

1Section and Topic	Item #	Checklist item	Location where item is reported
<b>TITLE</b>			
Title	1	Identify the report as a systematic review.	1
<b>ABSTRACT</b>			
Abstract	2	See the PRISMA 2020 for Abstracts checklist.	1
<b>INTRODUCTION</b>			
Rationale	3	Describe the rationale for the review in the context of existing knowledge.	2
Objectives	4	Provide an explicit statement of the objective(s) or question(s) the review addresses.	2
<b>METHODS</b>			
Eligibility criteria	5	Specify the inclusion and exclusion criteria for the review and how studies were grouped for the syntheses.	2, 3
Information sources	6	Specify all databases, registers, websites, organisations, reference lists and other sources searched or consulted to identify studies. Specify the date when each source was last searched or consulted.	3
Search strategy	7	Present the full search strategies for all databases, registers and websites, including any filters and limits used.	Appendix 1
Selection process	8	Specify the methods used to decide whether a study met the inclusion criteria of the review, including how many reviewers screened each record and each report retrieved, whether they worked independently, and if applicable, details of automation tools used in the process.	3
Data collection process	9	Specify the methods used to collect data from reports, including how many reviewers collected data from each report, whether they worked independently, any processes for obtaining or confirming data from study investigators, and if applicable, details of automation tools used in the process.	4
Data items	10a	List and define all outcomes for which data were sought. Specify whether all results that were compatible with each outcome domain in each study were sought (e.g. for all measures, time points, analyses), and if not, the methods used to decide which results to collect.	2, 3
	10b	List and define all other variables for which data were sought (e.g. participant and intervention characteristics, funding sources). Describe any assumptions made about any missing or unclear information.	4
Study risk of bias assessment	11	Specify the methods used to assess risk of bias in the included studies, including details of the tool(s) used, how many reviewers assessed each study and whether they worked independently, and if applicable, details of automation tools used in the process.	4
Effect measures	12	Specify for each outcome the effect measure(s) (e.g. risk ratio, mean difference) used in the synthesis or presentation of results.	4
Synthesis methods	13a	Describe the processes used to decide which studies were eligible for each synthesis (e.g. tabulating the study intervention characteristics and comparing against the planned groups for each synthesis (item #5)).	4
	13b	Describe any methods required to prepare the data for presentation or synthesis, such as handling of missing summary statistics, or data conversions.	4
	13c	Describe any methods used to tabulate or visually display results of individual studies and syntheses.	4
	13d	Describe any methods used to synthesize results and provide a rationale for the choice(s). If meta-analysis was performed, describe the model(s), method(s) to identify the presence and extent of statistical heterogeneity, and software package(s) used.	4

1Section and Topic	Item #	Checklist item	Location where item is reported
	13e	Describe any methods used to explore possible causes of heterogeneity among study results (e.g. subgroup analysis, meta-regression).	4
	13f	Describe any sensitivity analyses conducted to assess robustness of the synthesized results.	4
Reporting bias assessment	14	Describe any methods used to assess risk of bias due to missing results in a synthesis (arising from reporting biases).	4
Certainty assessment	15	Describe any methods used to assess certainty (or confidence) in the body of evidence for an outcome.	4
<b>RESULTS</b>			
Study selection	16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	5, Figure 1
	16b	Cite studies that might appear to meet the inclusion criteria, but which were excluded, and explain why they were excluded.	Appendix 2
Study characteristics	17	Cite each included study and present its characteristics.	5-6, Appendix 3
Risk of bias in studies	18	Present assessments of risk of bias for each included study.	Appendix 4
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Appendix 5
Results of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	7-12
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	7-12
	20c	Present results of all investigations of possible causes of heterogeneity among study results.	Appendix 7
	20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized results.	Appendix 8
Reporting biases	21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each synthesis assessed.	NA
Certainty of evidence	22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.	Appendix 9
<b>DISCUSSION</b>			
Discussion	23a	Provide a general interpretation of the results in the context of other evidence.	12-14
	23b	Discuss any limitations of the evidence included in the review.	14-15
	23c	Discuss any limitations of the review processes used.	15
	23d	Discuss implications of the results for practice, policy, and future research.	15
<b>OTHER INFORMATION</b>			
Registration and protocol	24a	Provide registration information for the review, including register name and registration number, or state that the review was not registered.	2
	24b	Indicate where the review protocol can be accessed, or state that a protocol was not prepared.	2

1Section and Topic	Item #	Checklist item	Location where item is reported
	24c	Describe and explain any amendments to information provided at registration or in the protocol.	NA
Support	25	Describe sources of financial or non-financial support for the review, and the role of the funders or sponsors in the review.	17
Competing interests	26	Declare any competing interests of review authors.	17
Availability of data, code and other materials	27	Report which of the following are publicly available and where they can be found: template data collection forms; data extracted from included studies; data used for all analyses; analytic code; any other materials used in the review.	17
