**Figure S1.** Relative levels of extracellular metabolites in cells-conditioned medium, normalized to the initial levels in the acellular medium (100%). The graphs are grouped according to the differences detected in the medium of ATC- and/or LDC-treated cells compared to that of untreated controls. Statistical significance calculated in respect to controls (\* p<0.05; \*\*p<0.01; \*\*\*p<0.005; \*\*\*\*p<0.001).

**Table S1.** Metabolites identified in the SH-SY5Y cells' aqueous extracts based on 1D and 2D NMR spectral data. The chemical shifts of signals selected for integration are in bold.
