

**Supplementary Table S1:** Table details metabolites with significant changes. Req rounded to the second decimal place. Sub class information obtained using Metabolomics Workbench (<https://www.metabolomicsworkbench.org/databases/refmet/index.php>). “NA” lower match score or library match.

BinBase name	PubChem	KEGG	Superclass	rq_new_est	P Value
sorbitol	5780	C00794	Organic oxygen compounds	-1.744103192	3.03E-18

tryptophan	6305	C00078	Organoheterocyclic compounds	1.830114175	2.78E-18

**Supplementary Figure S1:** Heatmap of Pearson's correlation coefficients  $a$  between plasma concentrations of metabolites with cut-off  $r > 0.90$ . Significance for pairwise comparison detailed in the results section. The correlation score can be visualized through the scale bar on the right.

**A****B**

C

**Supplementary Figure S2:** Comparative profiling of highly correlated metabolites per treatment stage. The lines represent mean of the scaled data for each metabolite. A: Comparison of levels of highly correlated metabolites in pre-surgery vs post-surgery. B: Comparison of levels of highly correlated metabolites in pre-radiation vs post-radiation. C: Comparison of levels of highly correlated metabolites in the four stages of treatment.
