Table of contents

Figure S1. The inter-assay coefficient of variation (CV%) of absolute concentrations of endogenous glycerolipids extracted by different methods P2

Figure S2. The inter-assay coefficient of variation (CV%) of absolute concentrations of endogenous glycerophospholipids extracted by different methods P3

Figure S3. The inter-assay coefficient of variation (CV%) of absolute concentrations of endogenous sphingolipids extracted by different methods P4

Figure S4. The inter-assay coefficient of variation (CV%) of absolute concentrations of endogenous CE, AcCa, AEA, and CoQ extracted by different methods P5

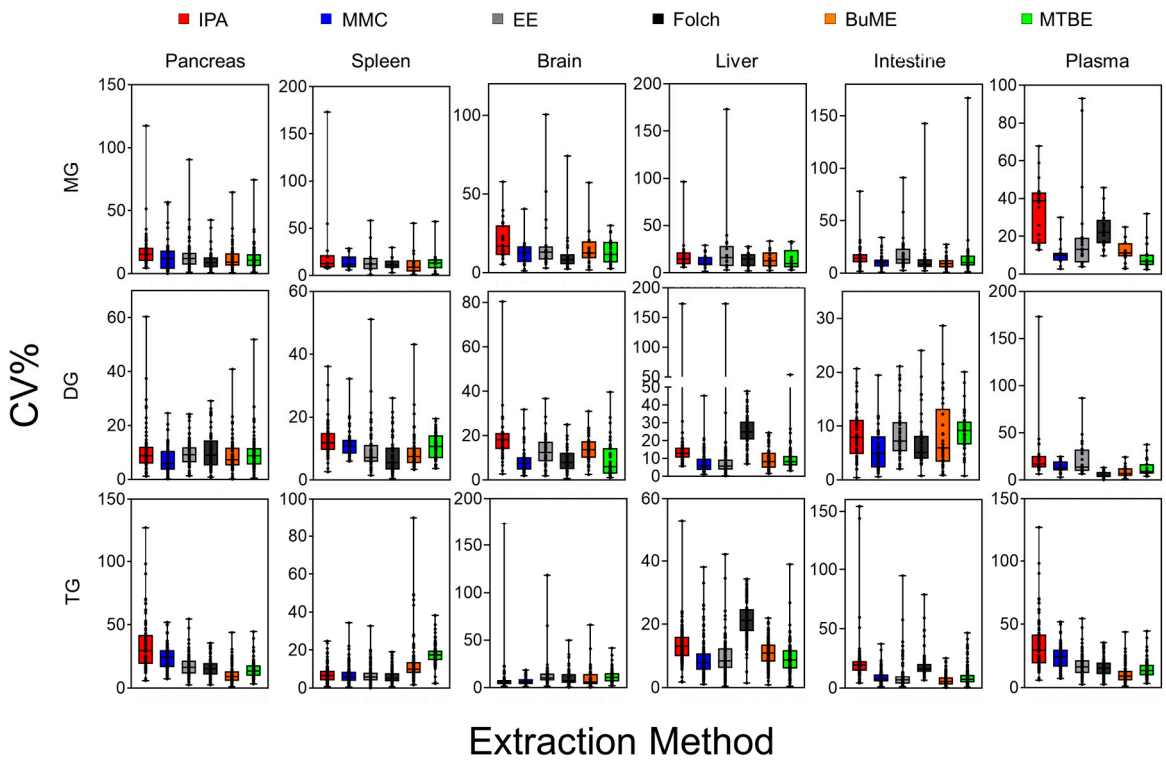

Figure S1. The inter-assay coefficient of variation (CV%) of absolute concentrations of endogenous glycerolipids extracted by different methods

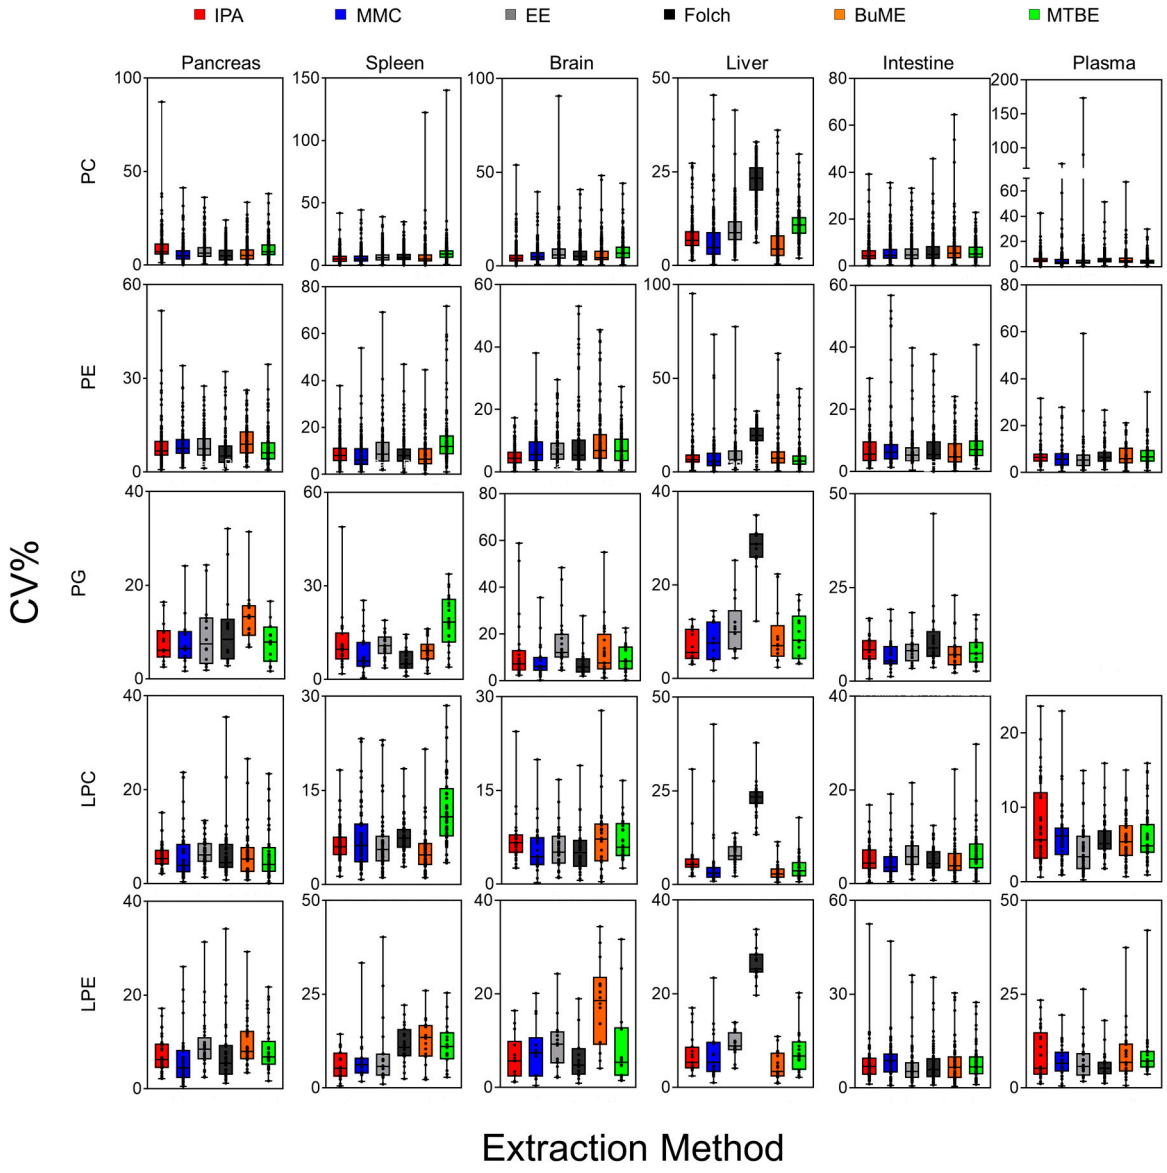

Figure S2. The inter-assay coefficient of variation (CV%) of absolute concentrations of endogenous glycerophospholipids extracted by different methods

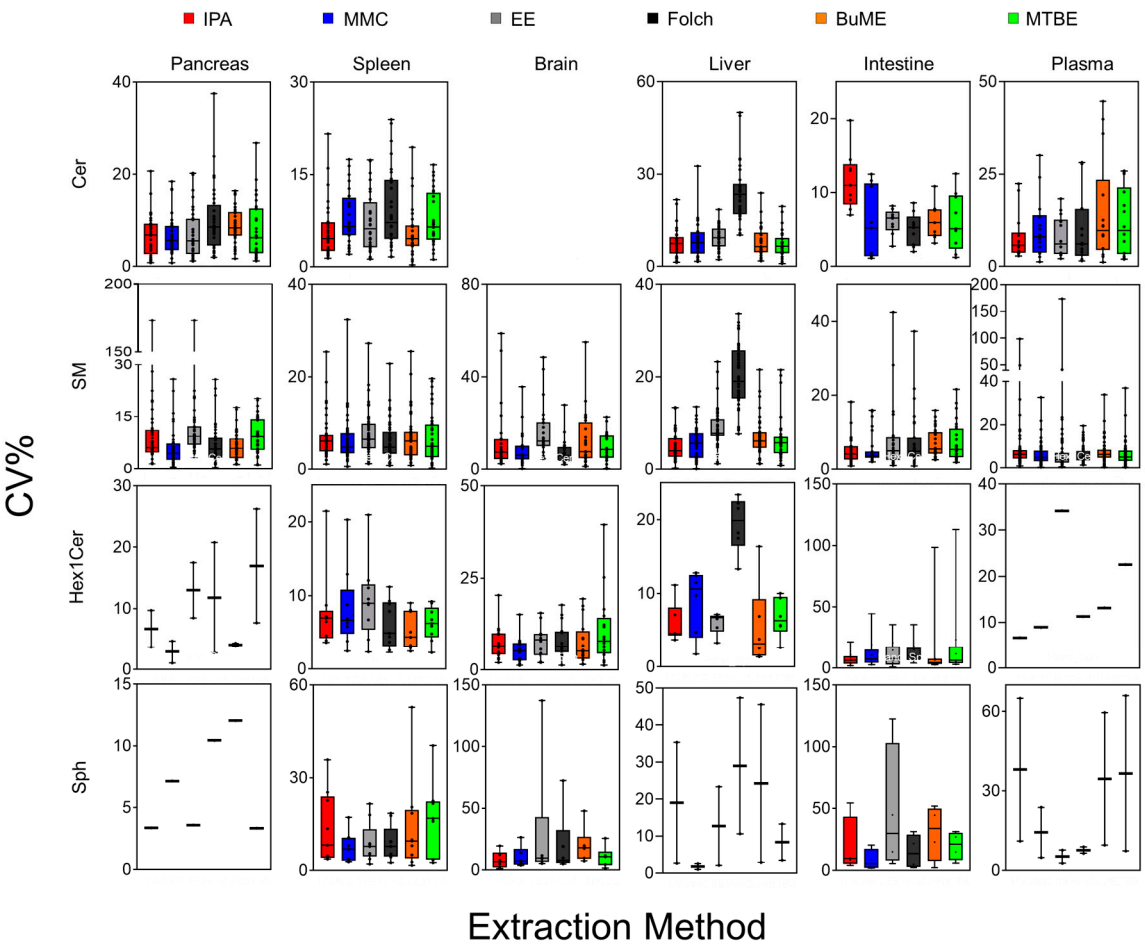

Figure S3. The inter-assay coefficient of variation (CV%) of absolute concentrations of endogenous sphingolipids extracted by different methods

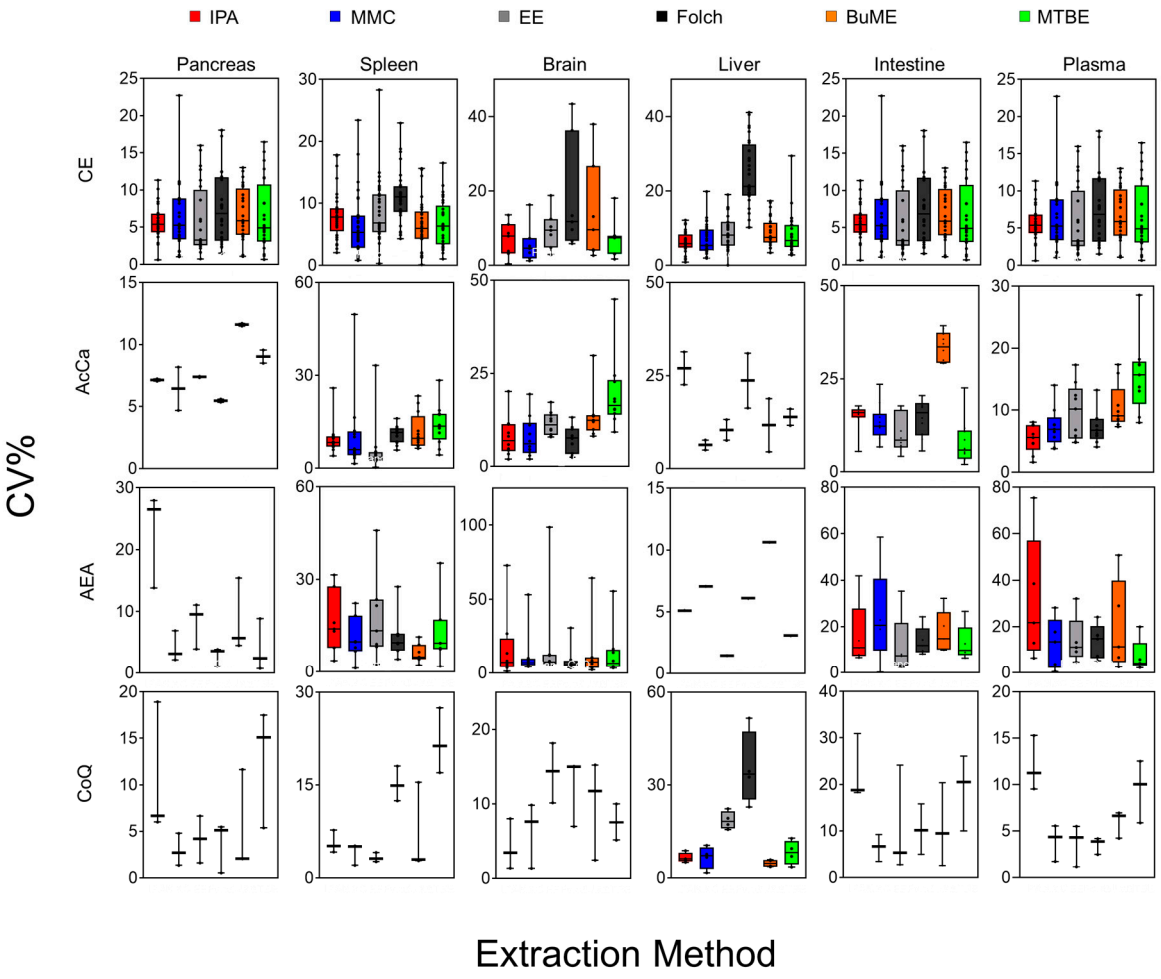

Figure S4. The inter-assay coefficient of variation (CV%) of absolute concentrations of endogenous CE, AcCa, AEA, and CoQ extracted by different methods
