

Table S2. Summary of *p* values from the Welch 1-way ANOVA indicating significance (values in bold) of differences in growth and nutritional indices between treatment groups and control group. MG- mass gain; RGR- relative growth rate; RCR- relative consumption rate; RMR- relative metabolic rate; ECI- efficiency of conversion of ingested food; AD- approximate digestibility; ECD- efficiency of conversion of digested food; MC- metabolic cost.

	MG	RGR	RCR	RMR	ECI	AD	ECD/M C
Anise 0.1%	<0.001	0.005	<0.001	0.112	0.011	0.065	0.074
0.25%	<0.001	0.003	<0.001	0.004	0.008	<0.001	0.086
0.5%	<0.001	<0.001	<0.001	0.004	<0.001	<0.001	<0.001
Dill 0.1%	0.019	0.057	<0.001	0.003	1.000	<0.001	1.000
0.25%	<0.001	0.011	<0.001	0.002	0.463	<0.001	1.000
0.5%	<0.001	<0.001	<0.001	0.014	<0.001	<0.001	<0.001
Fennel 0.1%	0.001	0.007	0.001	0.196	0.039	0.292	0.199
0.25%	<0.001	0.006	<0.001	0.002	0.156	0.042	0.906
0.5%	<0.001	<0.001	<0.001	0.009	<0.001	<0.001	<0.001
