

**Figure S2.** Mean normalized expression of candidate genes in susceptible (SCNU-C-3328) and resistant (SCNU-C-3470) cabbage lines. Error bar represents  $\pm$  S.E.M of the means of triplicates. Asterisks indicate significant difference in expression level (\* $P < 0.05$ , \*\* $P < 0.01$ , Student's t-test).
