Notes: RI, retention index; Rt, retention time in the capillary GC column; the suffixes -M represents monomer, the suffixes -D represents dimer.

**Figure S1.** Permutation test of OPLS-DA model.

**Figure S2.** Hierarchical clustering analysis of the bacteria in pre-cooked seasoned crayfish tail during storage at room temperature.

**Figure S3.** Relative abundance of KEGG metabolic pathways in pre-cooked seasoned crayfish tail with different treatments during storage at room temperature. Different letters in the figures indicate that there are significant differences between groups at the same day.
