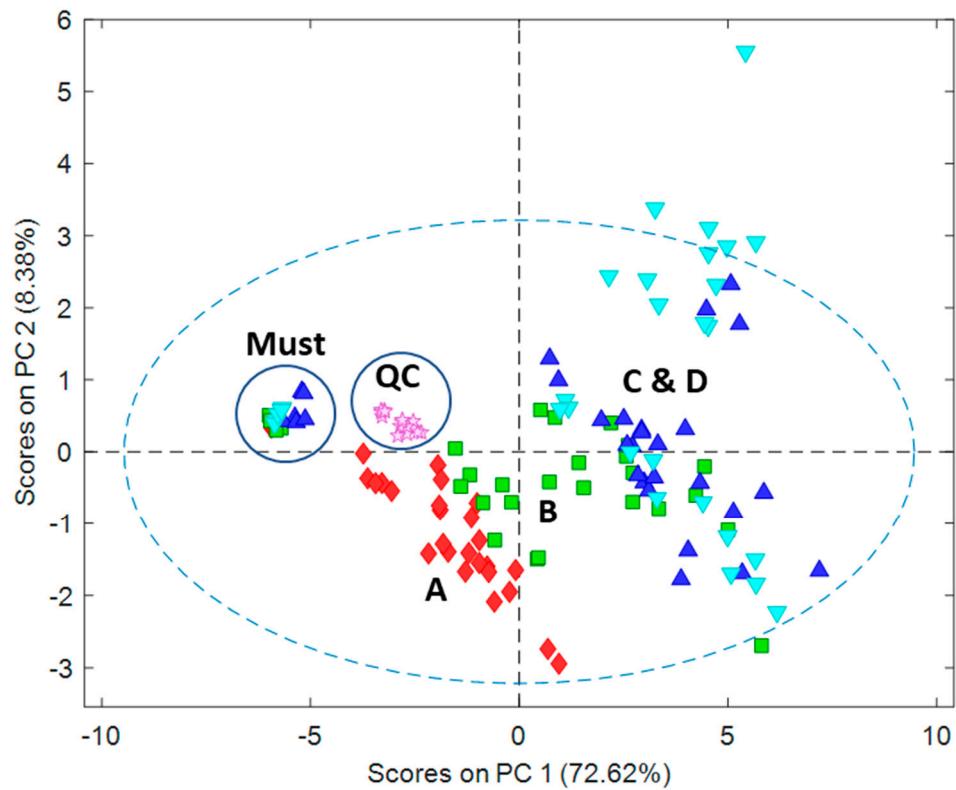

Figure S1. PCA score plot of PC1 vs. PC2 for the exploratory evaluation of samples using AA profiles as the data. Sample assignment: Star, QC; Rhombus, Quality A; Square, Quality B; Triangle (vertex up), Quality C; Triangle (vertex down), Quality D.

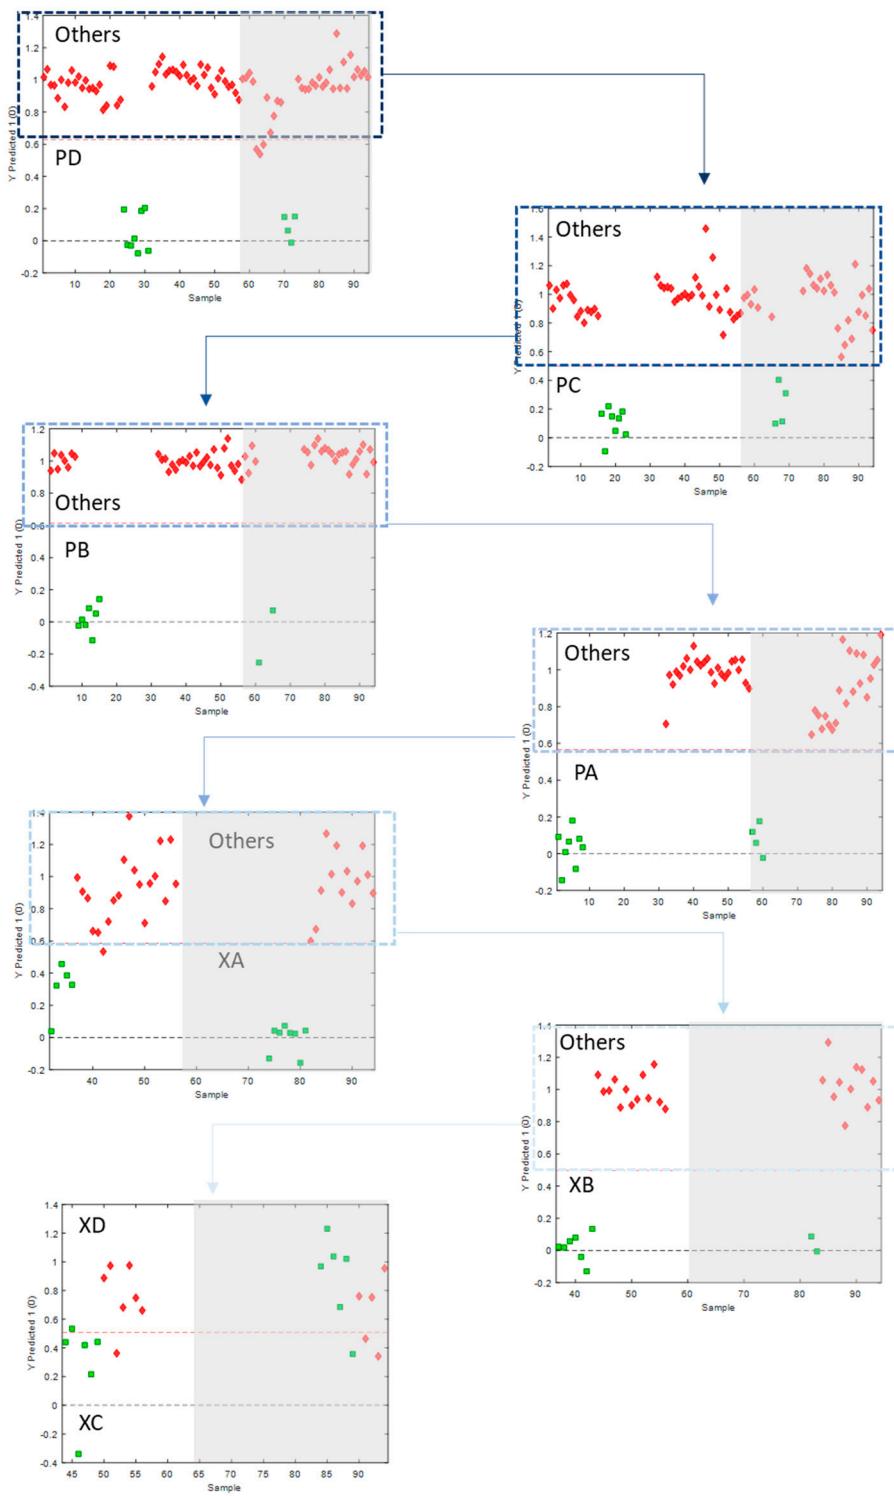

Figure S2. Two-class classification models obtained by PLS-DA according to the calibration tree shown in Figure 6. The calibration set comprises the 60% of all samples randomly chosen and the prediction set the 40% remaining samples.

Table S1. Parameters of the MS instruments for the set of analytes under study. DP, declustering potential; CE, collision energy, CXP, cell exit potential.
