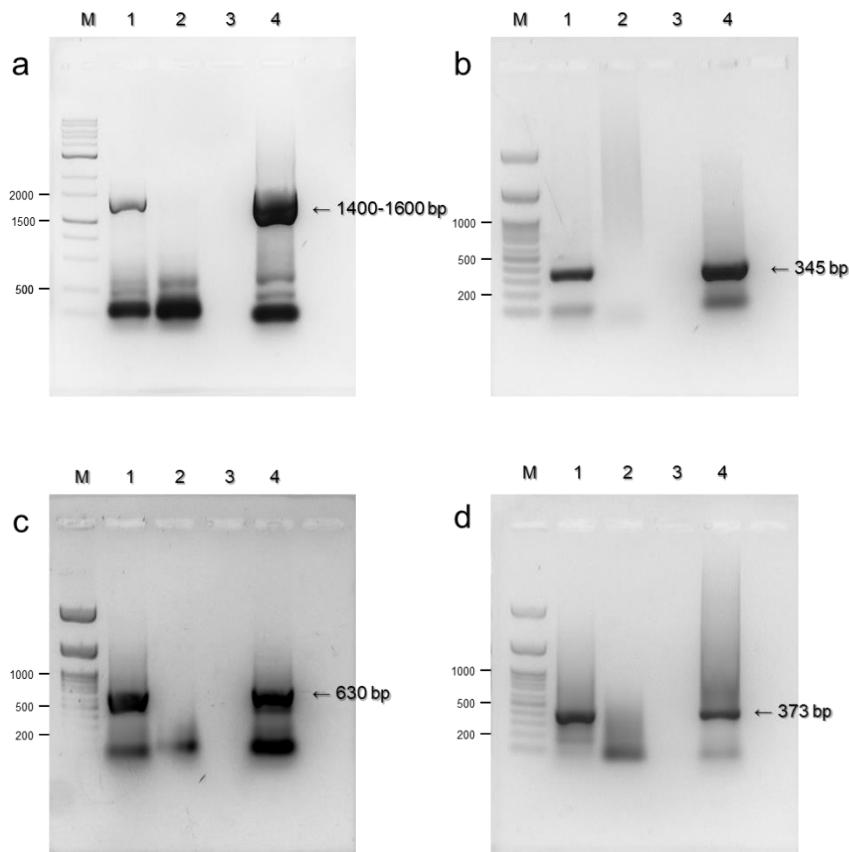

Figure S1. Agarose gel electrophoresis of (a) BTH PCR products, (b) EHR PCR products, (c) *gltA* PCR (primer set 1) products, and (d) *groEL* PCR (primer set 1) products. The expected amplified product size is shown with an arrow. Lanes M, 1, 2, 3, and 4 indicate DNA size marker, PCR-positive sample, PCR-negative sample, negative control (water), and positive control (*Babesia* or *Anaplasma* DNA), respectively.
