

Figure S1. Electrophoresis result for the molecular identification of *Alternaria jacinthicola* using four fungus primer pairs. M: DL2000 marker; Lane 1: PCR products amplified using ITS1/ITS4 primer pair; Lane 2: PCR products amplified using EF1-728F/EF1-968R primer pair; Lane 3: PCR products amplified using Alt F/Alt R primer pair; Lane 4: PCR products amplified using gpd1/gpd2 primer pair.
