# Sustainable Big Data Analytics and Machine Learning Technologies

Guest Editor:

### Dr. Jenq-Haur Wang

Department of Computer Science and Information Engineering, National Taipei University of Technology, Taipei 10608, Taiwan

Deadline for manuscript submissions: closed (15 March 2024)

### Message from the Guest Editor

With the advances in big data analytics and machine learning technologies, people's daily lives have been improved in many different ways, largely due to the development of deep learning algorithms. However, deep learning algorithms rely on powerful machines and systems with GPUs to accomplish the complex and long training process. On the one hand, big data analytics solutions utilize distributed frameworks to scale out in terms of data parallelism or task parallelism. On the other hand, the impact of technology on environmental changes could lead to significant damages that also jeopardize human lives and global ecology. Many efforts have begun to address the sustainability issues by containing the environmental changes and slowing down deteriorationfor example, addressing climate change, water resources, air quality, etc.

This Special Issue focuses on ideas such as big data analytics for sustainability, federated learning, and distributed deep learning. We aim to seek potential solutions and empirical studies that investigate sustainable technologies that are also energy efficient and resource efficient.

School of Computer Science and Engineering, South China University of Technology, Guangzhou 510641, China

### Message from the Editor-in-Chief

*Big Data and Cognitive Computing (BDCC)* is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility**: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

**Journal Rank:** JCR - Q1 (Computer Science, Theory and Methods) / CiteScore - Q1 (Management Information Systems)
