

Special Issue

Synthetic Greenhouse Gases

Message from the Guest Editors

Synthetic greenhouse gases, of which fluorine-containing gases dominate in terms of their widespread use throughout the world, find use in a wide variety of applications. The widespread use of these gases however, has had a direct and measurable effect on the earth's atmosphere, and consequently their manufacture, use, management and disposal is closely scrutinized and monitored. There is significant effort in private industries, government bodies, research institutes and universities to develop regulations, protocol, incentives and end of life treatment technologies, aimed at reducing the emission of these compounds into the receiving environment. Based on these ideas, we are inviting authors to present papers and short reviews in a broad range of topics for this Special Issue on "Synthetic Greenhouse Gases". Prof. Dr. Wenfeng Han Prof. Dr. Michael Stockenhuber

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Alírio E. Rodrigues

Laboratory of Separation and Reaction Engineering - Laboratory of Catalysis and Materials (LSRE-LCM), Department of Chemical Engineering, Faculty of Engineering, University of Porto, 4200-465 Porto, Portugal

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 7.6 days (median values for papers published in this journal in the first half of 2024).
