Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editor

Dear Colleagues,

In 2022, we are celebrating the 10th anniversary of the journal *Actuators* (ISSN: 2076-0825). Our sincerest thanks go to our readers, innumerable authors, anonymous peer reviewers, editors, and all the people working for the journal in some way who have contributed their efforts for years. These highlights would not have occurred without your participation.

To mark this significant milestone, a Special Issue entitled “10th Anniversary of *Actuators*” is being launched. This Special Issue includes high-quality papers under the broad scope of *Actuators*. We would like to invite you to contribute an original research paper or a comprehensive review article on a trending or hot topic for peer review and possible publication.

New ideas and unique proposals for future research and tutorial manuscripts for use in the instruction of junior researchers in this field are also encouraged.

an Open Access Journal by MDPI

Message from the Editorial Board

We are just entering the Next Wave of Technology (NWT) where actuators will play the same role as the computer chip did for computers/social media approximately four decades ago. Just in the U.S., production of \$1 trillion year of electromechanical systems (vehicles, orthotics, manufacturing cells, freight trains, aircraft, etc.) will be impacted by the NWT, all driven by actuators. Five key trends can be found for the future perspectives: “Performance to Reliability”, “Hard to Soft”, “Macro to Nano”, “Homo to Hetero” and “Single to Multi functional”. We invite papers that primarily impact these economic sectors; those illustrating basic scientific principles are also welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within SCIE (Web of Science), Scopus, Inspec, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1 (Control and Optimization)
