### Message from the Guest Editors

In the current knowledge economy, organisations, which are created under different legal forms, need to be sustainable. Moreover, these legal forms influence the adoption of specific governance and management models, which can be grounded in several theories (e.g., institutional, stakeholder). In fact, organisations increasingly need to be transparent and accountable to their different stakeholders, which stresses the importance of fostering relationships with them.

This Special Issue aims to open a discussion on institutions—more specifically, on how they should adapt their governance models to the challenges posed by internationalisation and sustainability while fostering their relationships with different stakeholders.
