submissions:

closed (30 June 2022)

Message from the Guest Editors

Research about Gender, Relational capital and Technology involves researches about their definitions as economic variables, in broad and specific sense, as well as their relationships, to explain productivity variations and economic development. Businesses and economic systems represent the main places where Natural and Cultural differences melt Gender, Relational capital and Technology to realize ever changing businesses and economies at Micro and Macro levels. The Special issue aims at deepen the theoretical and practical economic approaches to these fields of research and their relationships, with both the goals of outlining the state of the art and expanding the borders in Gender, Relational capital and Technology, as determinant variables in order to understand businesses, economies and economic theory future trends.

Message from the Editor-in-Chief

Welcome to *Administrative Sciences*, the journal aims to advance and communicate knowledge concerning management theory and practice both in public administration and in profit organizations; it encourages submissions that build on interdisciplinary research in related fields, such as business, economics, political science, gender studies, psychology, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. Join us on a journey through the *Administrative Sciences*, where management merges with innovation.
