Message from the Guest Editors

Dear Colleagues,

From the 1970s to the early 1990s, a considerable stream of legal actions in different countries has allowed the disclosure of internal documents and memos of allegedly respectable corporations regarding their actual management of polluting or otherwise damaging activities for workers, consumers, or the collectivity at large. As a result, the darker aspects of business behavior are being empirically investigated by a growing number of disciplines and scholars, revealing the existence of a highly sophisticated and widespread pattern of criminal conduct.

We welcome original manuscripts dealing with the wide-ranging interdisciplinary implications of the value-maximizing behavior of corporations based on hiding and manipulating information and discussion of the suggested institutionalist unifying conceptual framework for the study of corporate crime.
