Message from the Guest Editors

Dear Colleagues,

A Special Issue will be prepared for Administrative Sciences that has, as a theme, corporate social responsibility disclosure and assurance consequences at economic, financial and market level. We invite papers that focus on understanding the consequences, not only of socially responsible disclosure—a voluntary strategy—but also of the external assurance process that achieves an increase on its credibility and reliability.

Specifically, contributions may focus on, but are not limited to, issues and topics such as:

- Corporate social disclosure, determinants and consequences
- Corporate social disclosure and sustainability assurance: a new trend
- New trends in sustainability reporting and assurance: the role of stakeholder
- Sustainability assurance and economic, financial and market consequences

Contributions can be theoretical and/or empirical.

Dr. Isabel-María García-Sánchez
