Message from the Guest Editors

Dear Colleagues,

We welcome empirical contributions in the form of country-specific studies or international comparisons that explore the impact of artificial intelligence on reshaping public administration.

Relevant theoretical perspectives may include (but are not limited to):

- The implication of artificial intelligence in transforming public administration;
- Inclusive growth through AI-driven innovations;
- Artificial intelligence and bureaucracy;
- Efficient public resource management;
- Smart governance and decision-making efficiency;
- Innovation and economic growth;
- Smart infrastructure development, urban planning and transportation systems optimization;
- Climate change and sustainable natural resource management;
- The role of AI in supporting proactive interventions to mitigate climate change impacts;
- Public administration risks and challenges in the world of AI;
- Improving public services through artificial intelligence;
- E-governance as a step of new public management;
- Leveraging artificial intelligence for a circular economy.
