### Message from the Guest Editors

Dear Colleagues,

In the past few decades the aerospace science and technologies have performed outstanding advances in the use of composite materials for aerospace applications. Progresses in development of high-performance structural materials and their applications with cutting-edge manufacturing processes represent nowadays one of the main attractive research fields together with the ever-growing capability to simulate the behavior of such materials starting from constituents' materials up to the full-scale structures, pointing towards the virtual testing and the digital twin approach.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

*Aerospace* adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Aerospace*) / CiteScore - Q2 (*Aerospace Engineering*)
