30 October 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Aerospace* will explore the important and evolving field of aerospace anti-icing systems. As aviation technology continues to advance, the importance of sophisticated anti-icing technologies, especially those that align with sustainability goals, cannot be overstated. Ensuring the safety, efficiency, and environmental compatibility of aircraft, particularly under adverse weather conditions, is paramount. This issue aims to highlight the latest advancements, challenges, methodologies, and sustainability considerations in the development and application of anti-icing systems for the aerospace industry.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Aerospace*) / CiteScore - Q2 (*Aerospace Engineering*)
