Message from the Guest Editor

Dear Colleagues,

Since its very beginning, the aerospace sector has consistently promoted scientific research. In particular, combustion systems, which encompass most aerospace engines for thrust generation, have been driving investigations into thermofluid dynamics, with a positive impact on other sectors, too, such as power generation for electric systems. The great interest in burning green propellants in gas turbines has opened new challenges for the identification of the most suitable combustion technology.

Deadline for manuscript submissions:

closed (31 October 2022)

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Aerospace*) / CiteScore - Q2 (*Aerospace Engineering*)
