Laser Ultrasound Techniques for Aerospace Applications

Guest Editors:

Dr. Chen Ciang Chia

Department of Aerospace Engineering, Korea Advanced Institute of Science and Technology, Daejeon 34141, Republic of Korea

Dr. Mohammad Yazdi Harmin

Department of Aerospace Engineering, Faculty of Engineering, Universiti Puta Malaysia, Serdang 43400, Selangor, Malaysia

Deadline for manuscript submissions:

15 September 2024

Message from the Guest Editors

Dear Colleagues,

Ultrasonic testing plays a crucial role in ensuring structural integrity and performance evaluation across the aerospace industry. However, conventional contact ultrasound methods have limitations for in situ inspection of complex aircraft components. Recently, laser-based non-contact ultrasound techniques have shown great potential to address these challenges.

This Special Issue aims to advance the field by bringing together the latest research. Original contributions are invited to address topics including, but not limited to, innovative laser ultrasound generation and detection techniques; multi-modal wave analysis and imaging algorithms; coupling characterization for advanced materials and surfaces; laser-based simulation of pyroshock, mechanical shock waves, or acoustic emissions; and case studies demonstrating field trials. Both theoretical and experimental studies that propel the methodology toward routine industrial deployment are welcome.

Dr. Chen Ciang Chia Guest Editor

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases. **Journal Rank:** JCR - Q2 (*Engineering, Aerospace*) / CiteScore - Q2 (*Aerospace Engineering*)
