

Special Issue

Structural Design of Aerospace Vehicles

Message from the Guest Editor

Topology optimization is considered state-of-the-art technology in the structural design of aerospace vehicles, offering an early and improved insight into shape design. This Special Issue of *Aerospace* covers recent computational efforts toward the design of the structural components of an aircraft. Furthermore, we will explore the integration of topology optimization tools in aircraft design. Authors are invited to submit papers on current challenges in topology optimization modeling of various aerospace vehicles along with developing methods that will accelerate model and part design using topology optimization.

Guest Editor

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building
South, University Avenue, Glasgow G12 8QQ, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2 (Aerospace Engineering)
