González**

Deadline for manuscript
submissions:

25 October 2024

Message from the Guest Editors

Agricultural and agro-industrial activities are responsible for the overproduction/overaccumulation of many types of waste, raising huge environmental concern due to the scarcity of sustainable treatments and applications for these wastes. Therefore, the production and consumption systems throughout the supply chain need to be upgraded. Special attention should be focused on the full valorization of food waste materials, especially due to their interesting chemical composition and structural characteristics. This Special Issue emphasizes the development of biorefinery cascading processes for the investigation of valorizing food waste from agricultural and agro-industrial sectors, yielding high-impact and valuable products. This issue on Biorefinery Processes for Food Waste Valorization will involve multidisciplinary areas comprising agriculture and agro-industry, with the disciplines of biotechnology, food science, bioprocessing, food chemistry, and engineering. Research articles will cover a broad scope of food waste from the processing of any type of crop, including vegetables and fruits as well as plants and trees.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
