

Climate Smart Agriculture: Climate Change, Responses of Crop Plants and Evolving Mitigation and Adaptation Strategies

Guest Editors:

Dr. Raveendran Muthurajan

Dr. Vellingiri Geethalakshmi

Dr. Viswanathan Chinnusamy

**Dr. Madavalam S.
Sheshshayee**

Deadline for manuscript
submissions:
closed (25 April 2023)

Message from the Guest Editors

Limited knowledge regarding the impacts of climate change on growth and the development of crops and changing frequency of pest/disease occurrence raise serious concerns. The generation of improved knowledge on the above areas will empower scientists in formulating effecting mitigation/adaptation strategies so as to pave the way for the sustained growth of agriculture under changing climatic conditions. Advances in sensor technologies for precise recording of weather events, availability of big data analysis and weather prediction tools, availability of phenomics and genomics platforms for recording crop responses against changing climate, and innovative breeding/genomic platforms for accelerated crop improvement have empowered scientists to fight against climate change.

In this Special Issue, original research papers and reviews from global experts will be published after peer review. The readers will benefit from a wide array of information on the effect of a changing climate on agriculture and status of mitigation/adaptation strategies developed to sustain agriculture under a changing climate.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
