Deadline for manuscript submissions:

closed (20 July 2024)

Message from the Guest Editors

This Special Issue, "Machine Vision Solutions and AI-Driven Systems in Agriculture", focuses on the transformative synergy between machine vision and artificial intelligence (AI) in advancing agricultural practices. This includes employing machine vision to identify animal behaviours for enhanced livestock monitoring. Additionally, it investigates the integration of AI-driven systems in the creation of, e.g., early-warning mechanisms for livestock health, thus demonstrating the potential to predict and prevent diseases or problems. Authors contributing to this Special Issue will illuminate the profound impact of these technologies on agriculture, showcasing innovative approaches that utilize machine vision and AI for improved efficiency, sustainable practices, and proactive disease management.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
