Deadline for manuscript submissions:

10 November 2024

Message from the Guest Editors

In the context of depleting traditional feed supplies and environmental problems in agriculture, innovative formulations and feed additives exhibit potential. These developments seek to enhance animal performance and meat quality through specific diets and biotechnology. Furthermore, the emphasis on sustainability encourages the development of alternative feed supplies and sustainable additives, mitigating the environmental impact of animal husbandry.

This Special Issue will investigate the influence of innovative feeds and additives on the performance of farm animals, their carcass quality, and meat quality. We encourage the submission of articles that provide novel insights into the productivity enhancements and alterations in carcass composition resulting from these advancements. Topics include growth rates, feed efficiency, nutrient utilization, and meat quality parameters. Both original research articles and reviews are welcome.

Keywords: new feeds; additives; farm animals; performance; meat quality; nutrition; growth rates; carcass composition; feed efficiency; sustainability

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
