Deadline for manuscript submissions:

**closed (20 June 2024)**

### Message from the Guest Editors

Analytical Chemistry and particularly chromatographic analytical methods play a key role for the attainment of the UN Sustainable Development Goals that are directly or indirectly connected to Agriculture.

Contamination of the agro-environment with pollutants applied or produced through agricultural practices, smart agriculture for food quality, determination of plant metabolites aiming to detect and/or measure plant responses under particular conditions, or confirmation of alternative approaches of agricultural practices are examples of the sectors of Agriculture in which analytical methods can be applied.

This Special Issue aims to cover the wide scope of chromatographic analytical methods applied in all sectors of agriculture and include interdisciplinary studies embracing agriculture with disciplines of chemistry, biology, and engineering. Research articles are expected to cover various sample preparation procedures, chromatographic and detection techniques. Detected compounds (including metabolites, degradation products, co-formulants, impurities and volatile compounds, etc) and tested substrates can be of great variance.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
