Deadline for manuscript
submissions:

25 November 2024

Message from the Guest Editor

Due to the growing expectations of consumers and meat producers, animal production must constantly evolve and seek new solutions. Nowadays, consumers want meat with high nutritional value and beneficial nutritional qualities, without antibiotics and residues of heavy metals. Future requirements for animal breeders will not only include improvements in efficiency, sustainability, and animal welfare but also in the production of high-quality meat. Thus, both effective technologies and management systems in farm animal production are required.

This Special Issue brings together the latest advantages in the development of animal production aimed at obtaining high-quality meat. Contributions related to the influence of environmental factors on meat quality and analyses of the classification and prediction of breeding factors affecting meat's safety and quality are also welcome. We believe this Special Issue will contribute to the promotion of the latest knowledge for a wide audience, both among livestock breeders and scientists.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
