closed (15 February 2024)

Message from the Guest Editor

Farm entrepreneurship and agribusiness management are related concepts that involve applying business skills and knowledge to the agricultural sector. Farm entrepreneurship can play a role in agricultural sustainability through the development of innovative solutions that improve the environmental and social impacts of food production and consumption. Farm entrepreneurs can also benefit from government policies and programs that support sustainable farming practices, such as the Environmental Land Management schemes in the UK or the Rural Development Programmes of the EU member states that are offering funding opportunities to farmers and are designed for boosting innovation in Europe.

The scope of this Special Issue is to address the main challenges faced by farm entrepreneurs in the UK and Europe and to identify successful strategies that would lead to effective and efficient agribusiness management practices.
