Message from the Guest Editors

Dear Colleagues,

The development of technological processes and technologies for the food industry, as an imperative requirement for the diversification and the improvement of the quality of products necessary for the nutrition of human beings, requires continuous research for the development, improvement and optimization of the construction and operation of the specific machineries and installations.

At the same time, in order to increase the efficiency of the production and diversification of the food products, researchers should aim to consider unprecedented areas of study for the development, diversification and automatization of technological lines, which should address the requirements regarding the environment and food safety, as well as the ones regarding the decrease in energy consumption.

Considering all the aspects mentioned above and being aware of the research themes specific to the equipment and machinery for food industry, we invite researchers, academic staff and engineers with significant scientific results in the advancement of this field to submit their work for publication in this Special Issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
