Deadline for manuscript  
submissions:

**20 June 2024**

### Message from the Guest Editors

Agroecosystem pollution has become a danger affecting all forms of life on Earth. Specifically, different agricultural practices and the improper disposal of toxic waste are potential sources of contamination that lead to the bioaccumulation of noxious chemicals in agroecosystems. Furthermore, numerous families of contaminants, such as plant protection products (PPPs), nutrients, persistent organic pollutants, potentially toxic trace elements, plastic debris, pharmaceuticals, and veterinary and personal care products, can potentially impact the agroecosystem.

This Special Issue is thus aimed at soliciting original contributions from academics, researchers and other stakeholders providing data on the detection, analysis, and management of agricultural pollutants and waste in agroecosystems in different countries at regional, national, or continental scales. The editors encourage submissions that discuss applications of innovative and/or novel methodologies within the scope of the Special Issue, including original research, opinions and review articles.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
