# Molecular Mechanisms Controlling Crop-Fungal Pathogen Interaction

Guest Editor:

#### Dr. Wei Zhang

Department of Plant Pathology, Kansas State University, Manhattan, KS 66506, USA

Deadline for manuscript submissions: closed (25 January 2024)

### Message from the Guest Editor

Fungal pathogens in crops pose annual threats to world food security due to the causes of severe and often fatal diseases in crops that result in great yield and economic loss worldwide. Phytopathogenic fungi cause different symptoms (i.e., leaf spots, blights, rust, canker, vascular wilt, root rot, etc.) due to the varied molecular mechanisms, such as toxin and small effector protein injection. However, many details of infection and plant defense against fungal infection remain unclear. The advancement of genomics and biotechnological tools enables the fast-paced research in this field and, in turn, reveals more molecular details and mechanisms. underlying many of such crop plant-fungal pathogen interactions. This Special Issue is devoted to covering a range of recent advances in crop plant-fungal pathogen interactions at the molecular level and cutting-edge approaches for crop fungal disease control. We welcome all relevant molecular and genomic original research and review articles targeting either model plant-fungus interaction or interactions between crops and fungal pathogens causing devastating damage.

#### Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
