### Message from the Guest Editors

Dear Colleagues,

Arbuscular mycorrhizal fungi (AMF) have become attractive as biostimulants in agriculture due to their known input to plant nutrient uptake and stress tolerance. AMF are ubiquitous widespread soil microorganisms, which can form a symbiotic association with the majority of agricultural plants. These beneficial microbes have been proved to offer an array of advantages to host plants. AMF can improve crops' nutrient status, also enhance their quality and yield in the face of challenges to produce enough healthy food to supply the global population in the conditions of an unstable economy, climate change, and biodiversity degradation.

The focus of this Special Issue is to consider different points of view linked to the use of AMF as an environmentally friendly tool in both greenhouse and field crop production. For this reason, it welcomes high-quality studies on the application of mycorrhizal fungi to enhance crop performances and production as well as on the role of these soil microorganisms in crop stress tolerance and sustainability improvement. All types of manuscripts (original research and reviews) are accepted.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
