Deadline for manuscript
submissions:

5 September 2024

Message from the Guest Editor

Plant breeding aims to provide improved cultivars that address human needs. These cultivars must show enhanced productivity, appropriate produce quality, climate resilience, and host plant resistance to pathogens and pests. Plant breeding contributes further to sustainable agriculture intensification by reducing the negative impacts on agroecosystems by releasing cultivars with input use efficiency that are suitable for conservation agriculture. This Special Issue will thus focus on the scientific and technical advances in knowledge, methods and tools that facilitate and accelerate the release of genetically enhanced seed-embedded technology that meets the current and future expectations of markets worldwide. Research or review articles on the following topics are welcome for this Special Issue:

How to improve selection accuracy considering the product profiles?

What may work for increasing genetic gains and steady cultivar replacement?

Where to breed crops for the future?

When to increase genetic variation in the breeding pool?

Which breeding methods and tools may enhance selection intensity?

Who will deliver the seeds of cultivars in 2050?

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
