Deadline for manuscript  
submissions:

**25 January 2025**

### Message from the Guest Editor

The increasing global demand for sustainable energy sources and the urgent need to mitigate climate change have propelled agricultural biomass into the spotlight as a viable alternative to fossil fuels.

Recent research has underscored the importance of optimizing biomass feedstock production through improved agronomic practices, genetic advancements, and integrated farming systems. Furthermore, the development of efficient conversion technologies, ranging from thermochemical to biochemical processes, has enhanced the viability of transforming agricultural residues into either energy or valuable bioproducts

This Special Issue seeks to provide a comprehensive overview of current trends, while also identifying future directions for research and policy. Therefore, authors are invited to contribute work related to the potential topics of this Special Issue, which include, but are not limited to, integrated biomass systems, using agricultural residues for bioenergy and bioproduct production, advanced biofuel production, sustainable practices, and saving GHG emissions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
