Deadline for manuscript  
submissions:

**closed (15 July 2024)**

### Message from the Guest Editor

The infected symptoms of fruit crop diseases varies, normally occurring on fruits, leaves, branches and roots. Diseases caused by fungi, bacteria, viruses, and other microbes on fruit crops form the limiting factors in realizing the yield potential, thus resulting in around 10-25% losses. Clarifying the pathogenic mechanism and strengthening the prevention and control of fruit diseases can help increase fruit yield, ensure fruit quality, improve fruit planting efficiency, and promote the healthy and sustainable development of the fruit crops planting industry. This Special Issue focuses on the development of Pathogen Biology and Disease Management in Fruit Crops, include the rapid molecular detection and disease diagnosis of plant pathogens, the pathogenic mechanism and significant pathogenic genes verification, the molecular interaction mechanism between pathogens and fruit host, microbiome responses to pathogens, disease resistant germplasm screening, resistance mechanisms, pathogen's drug resistance mechanism, the development of effective control technology and control mechanisms. All types of articles, such as original research, opinions, and reviews, are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
