Deadline for manuscript submissions:

15 January 2025

Message from the Guest Editors

The human population is continually expanding. The United Nations estimates that the world population will grow by nearly 4 billion people in 2100, which will exceed 11 billion people. This fact makes it necessary to change the current cultivation paradigm in order to feed a constantly growing population. However, it is not enough to just produce more; the production practices must be sustainable and environmentally friendly. Alongside the problem of overpopulation is the added, current problem of malnutrition. Therefore, it is necessary to search for new eco-friendly food production techniques that provide foods with better nutritional quality and that allow food to be supplied to the entire population.

Therefore, we are pleased to announce this Special Issue on “Agronomic Practices for Improving Growth, Quality, and Yield of Vegetables”, which will be a compilation of high-level scientific research, reviews, and high-level opinion articles. This Special Issue will address new and sustainable cultivation strategies that allow for improved vegetable production and quality.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
