Big Data Analytics and Machine Learning for Smart Agriculture

Guest Editors:

Prof. Dr. Maciej Zaborowicz
Department of Biosystems Engineering, Poznań University of Life Sciences, Poznan, Poland

Dr. Jakub Frankowski
Department of Bioeconomy, Institute of Natural Fibres and Medicinal Plants—National Research Institute, Wojska Polskiego 71B, 60-630 Poznań, Poland

Deadline for manuscript submissions:
closed (15 November 2023)

Message from the Guest Editors

Dear Colleagues,

At a time when digital technologies are organizing our lives increasingly boldly, and their benefits have not escaped any area of our lives including agriculture.

Data collection, processing and analysis are an indispensable part of modern management. In a world of ubiquitous sensors, recorders and devices transmitting millions of bits per second, it is difficult to find the right path, generalize and draw conclusions. All this prompts us to reach for modern IT tools, which not only allow us to systematize the acquired information but also to draw conclusions that result in the acquisition of new scientific knowledge.

The works presented in the Special Issue should be characterized by their applicability, but should also have a scientific aspect. Scientific articles should answer the question "how?" something is done, but also "why?" it happens.

I encourage everyone to present the results of their research in this Special Issue. The prerequisite for accepting a paper is an original idea and a take on the problem.

Special Issue

Editor-in-Chief

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.
Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
