Message from the Guest Editors

Conservation agriculture (CA) is an agro-ecological approach that aims to achieve the sustainable and profitable intensification of agricultural systems through the application of three inter-linked principles, based on locally-formulated practices: minimal soil disturbance, permanent soil cover, and crop rotation.

The obstacles to the adoption of CA farming systems need to be analyzed and removed. Advantages in economics, environmental and soil-quality aspects over conventional farming systems have also been evaluated. CA holds tremendous potential for all sizes of farms and agro-ecological systems.

This Special Issue intends to cover recent progress in different aspects related to the implementation of CA in a wide range of cropping systems across different agro-ecologies in the Mediterranean area.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
