Prof. Dr. Said A. Saleh

Horticultural Crops Technology Department, Agricultural & Biological Research Institute, National Research Centre, Dokki, Cairo 12622, Egypt

Prof. Dr. Chen Xiangning

Department of Food Science and Engineering, Beijing University of Agriculture, Beijing 102206, China

Deadline for manuscript submissions:

15 October 2024

Message from the Guest Editors

Vegetables provide vitamins, minerals, dietary fibres and health-promoting bioactive compounds. Numerous studies have documented the association between the consumption of vegetables and a lower risk of cardiovascular disorders, cancer, and diabetes mellitus. Providing consumers with vegetables of high nutritional quality is a mutual goal for breeding, cultivation, postharvest and processing.

This Special Issue focuses on the nutritional quality and human health of vegetable crops from farm to table tracking through the food industry. The issue will include interdisciplinary studies embracing agriculture with disciplines of biology, chemistry and medicine. Research articles will cover a broad range of vegetable germplasm evaluation, quality improvement by breeding, cultivation and quality regulation, technologies for postharvest storage and processing, modern analytical techniques, nutritional quality standards, metabolism and biotechnology as well as health functions. All types of articles, such as original research, opinions, and reviews are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
