

## Preparation, Function and Application of Agrochemicals

Guest Editors:

**Prof. Dr. Yan Wang**

Institute of Environment and Sustainable Development in Agriculture, Chinese Academy of Agricultural Sciences, Beijing 100081, China

**Prof. Dr. Kun Qian**

College of Plant Protection, Southwest University, Chongqing 400716, China

Deadline for manuscript submissions:

**25 January 2025**

### Message from the Guest Editors

The Special Issue will highlight cutting-edge research in agrochemical science. This includes the following:

- The use of nanotechnology in agrochemical delivery systems for enhanced targeting and reduced environmental exposure.
- The development of biopesticides and biofertilizers derived from natural sources.
- The application of genomics and proteomics in understanding the mode of action of agrochemicals and resistance mechanisms in pests.
- The integration of agrochemicals with other pest control methods.
- The development of decision support systems for the optimal use of agrochemicals based on environmental and economic factors.

Potential topics include but are not limited to the synthesis and characterization of new agrochemical compounds, the evaluation of the efficacy and safety of novel agrochemical formulations, studies on the environmental fate and impact of agrochemicals, field studies on the application of agrochemicals when integrated pest management systems, the analysis of economic and social implications of agrochemical use, and reviews on the current state and future prospects of agrochemical research and development.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
