Deadline for manuscript submissions:

closed (10 February 2024)

Message from the Guest Editor

With the recent focus on the circular economy, waste management has received much attention, leading to improved management technologies, strategies, procedures, and policies. Nonetheless, the complexity of waste means that management and policy decisions depend on the waste type, the composition of precursor substrate, available technology, and environmental impact. Thus, we seek new findings through cutting-edge research that have contributed effectively to turning solid and liquid wastes into value-added products. This also includes quantifying and harnessing special wastes (e.g., medical), including innovative waste recovery, recycling, and reuse approaches. This Special Issue will focus on solid and liquid waste management technologies, cost and environmental impact assessment, adapting precision agriculture in waste management and application, and related policy formulation.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
