Message from the Guest Editors

Dear Colleagues,

Sustainable farm development is a pivotal force to address the pressing challenges of food security, environmental pollution, climate change, and biodiversity loss. Promoting sustainable farm development is the main content of Sustainable Development Goals and is imperative to ensuring the harmonious coexistence of agricultural growth and environmental preservation.

Agricultural policy plays a vital role in driving sustainable farm development. Well-designed policies can provide incentives for farmers to adopt sustainable practices, such as offering subsidies for organic certification or promoting the use of renewable energy sources in agriculture. Moreover, agricultural policies can facilitate the dissemination of knowledge and best practices through training programs and extension services, empowering farmers to make informed decisions and implement sustainable farming methods. Policy interventions can also address market failures and ensure fair pricing mechanisms, which can incentivize farmers to invest in sustainable practices without compromising their economic viability.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
