### Message from the Guest Editors

Dear Colleagues,

Global crises including COVID-19 and political instability have an adverse impact on agricultural production and food supply chains. Chemicalization and mechanization of agriculture, on the one hand, increase labor productivity and crop yields. However, on the other hand, this increases the negative impact of agricultural production on the environment and requires the use of fossil resources (material and energy). Thus, the impact of agricultural production on a new qualitative level is increasing. The importance of environmentally friendly technologies is growing, including renewable energy sources, biofertilizers, energy-saving technologies, resource-saving technologies, the production of organic products, etc. In this regard, the concept of a circular economy becomes more important. This concept aims to reduce exhaustible resource consumption and harmful emissions by closing the production loop of raw materials, residues, products and energy.

This Special Issue will focus on the Green and Sustainable Agricultural Ecosystem and aims to solve the abovementioned issues. Original research manuscripts and systematic reviews are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
