Department of Geography, University of the Aegean, University Hill, 81100 Mytilene, Greece

Prof. Dr. Alexandros Koutsouris

Department of Agricultural Economics and Rural Development, Agricultural University of Athens, 11855 Athina, Greece

Deadline for manuscript submissions:

15 August 2024

Message from the Guest Editors

Agritourism combines elements of agriculture and tourism, providing additional income streams for farmers and rural communities. This diversification of rural economies can help mitigate rural–urban migration, reduce poverty and enhance the quality of life for rural communities, while encouraging the preservation of farming, promoting sustainable agricultural practices and contributing to the overall resilience of food systems.

Agritourism is typically associated with practices and farms of pre-industrial agriculture, rendering many farms unsuitable for participating. Agritourism activities offer opportunities for the public to engage with agriculture, learn about food production processes and develop a better understanding of where their food comes from.

This Special Issue delves into the intersection of agriculture and tourism, focusing on innovative approaches that foster sustainable growth in both sectors, but also with conflicts and negative impacts.

The Special Issue invites a diverse range of paper submissions, including empirical research, insightful case studies, conceptual frameworks and incisive policy analyses.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
